

Restoring the Estuary - Implementation Strategy of the San Francisco Bay Joint Venture

Restoration Plan Database: Crystal Reports of Individual Plan Summaries

I. BASIC PLAN DATA

Plan name:

Restoring the Estuary - Implementation Strategy of the San Francisco Bay Joint Venture

Brief description of plan:

The SFBJV Implementation Strategy serves as a concept plan for partners of the Joint Venture to accomplish the Joint Venture's goals and objectives by using an innovative collaborative and non-regulatory approach.

Region the plan is located within:

Pacific Region

Watershed(s) included within the plan:

P090w

Area plan covers (in square miles):

1,600.00 square miles

Plan scale:

County

Plan's lead organization(s):

San Francisco Bay Joint Venture

Plan's Main Contact Information:

John Thelen Steere
Director
San Francisco Bay Joint Venture
1330 Broadway
Suite 1100
Oakland, CA 94612
510-286-6767
510-286-0470

On-line version of plan:

www.sfbayjv.org/strategy.html

Date of original plan:

1/2001

II. TECHNICAL INFORMATION

Plan includes restoration goals: Y

Level of detail of the goals:

MS

Summary of the goals:

Protect 63,000 acres, restore 37,000 acres and enhance 35,000 acres of Bay habitat, which includes tidal flats, marshes, and lagoons.

Plan recommends restoration of specific project sites:

Y

Plan includes a discussion of funding sources:

Y

Plan addresses long-term protection of restored sites:

Y

Partners included in developing the plan:

Federal
State
Local
Business/Industry
Non-profit Organizations

Type(s) of public outreach included during plan development:

Information not available

Plan includes public outreach as part of plan implementation (e.g. annual public meeting, local group participation):

Y

Plan discusses the application of innovative approaches to restoration:

N

Plan make use of GIS mapping capabilities:

N

Plan addresses monitoring/reference sites for ecosystem level monitoring (baseline conditions) by:

G

Plan addresses monitoring/reference sites for project level monitoring by:

G

The plan discusses or coordinates with other restoration plans covering the same geographic area:

Y

Other plan names:

Baylands Ecosystem Habitat Goals, North American Waterfowl Management Plan

Plan contains detailed information on historic and/or current habitat size, rate of loss, acres restored or protected, etc.):

Y

Summary of this habitat information:

In the mid-1800's, there were 190,000 acres of tidal marshes, 50,000 acres of tidal flats, 85,000 acres of seasonal wetland and associated uplands, 69,000 acres of riparian habitat. Today, there are 40,000 acres of tidal marsh and less than 3% of the original wetlands acreage in relatively pristine condition. Between 1992 and 1999, about 16,300 acres of wetlands were protected and about 9,040 acres of degraded or former wetlands were restored and enhanced.
